

Graham Road Recycling and Disposal

Serving Eastern Washington and Northern Idaho, Graham Road Recycling and Disposal provides area businesses, industries, and the public with professional disposal services that are safe and convenient. This site is engineered with overlapping environmental protection systems that meet or exceed rigorous government regulations and are subject to highly regulated monitoring and reporting requirements. This "limited purpose" facility accepts primarily construction and demolition debris, industrial waste, and special waste; it does not accept municipal solid waste (MSW or household waste) or hazardous waste.

Containment Design

Our system protects the environment by ensuring that all waste is contained and isolated from soil and groundwater. The site's multi-layer composite liner system is built to strict engineering standards, using a 2-foot clay bottom and 60-mil high-density polyethylene (HDPE) liner. The final cap includes a soil foundation, 40-mil HDPE liner, drainage and soil layers, with a vegetative cover.

Groundwater Monitoring

Groundwater is monitored by 14 monitoring wells – four upgradient and ten downgradient. Monitoring results are submitted to the Spokane Regional Health District and the Washington State Department of Ecology.

Leachate Collection & Treatment

All waste cells have a leachate collection and removal system, which includes an automated pumping system that maintains sump levels below regulatory standards. Leachate is collected and managed in double-lined evaporation ponds.

GRAHAM ROAD RECYCLING AND DISPOSAL

1820 S. Graham Road
Medical Lake, WA 99022

Unacceptable Material

Batteries

Explosives

Hazardous Waste

Medical Waste (Untreated)

NORM

Waste Containing Free Liquid

Yard Waste

Additional Services Provided

Recycling services for asphalt, cardboard, concrete, heavy plastics, metal and wood.

Waste Approval Process

Waste Management has a defined waste screening protocol for each of its non-hazardous waste facilities, which protects both our employees and the environment. For all industrial and special waste streams, the generator or agent must complete a Generator's Non-Hazardous Waste Profile (available online at wmsolutions.com) for review by our technical staff.

Community Partnerships and Involvement

Waste Management is proud to be an active supporter of community events and programs that make our area a cleaner and healthier place to live, work and play.

Graham Road Recycling and Disposal has made 2.5 acres available to the West Plains Little League Association for the future development of a six-field baseball complex to serve young athletes and their families.

This facility also supports the following events, charities, schools and service groups:

Cheney High School All Night Graduation Party

Cheney High School Baseball

Heart Walk

Medical Lake Athletics

Rebuilding Together

Second Harvest Food Bank

West Plains Chamber of Commerce
